# Bitbucket의 Continuous Integration?

---

- Continuous Integration?
  - Major한 수정이 일어날 때 테스트를 자동으로 수행하는 것
- BitBucket에서 CI : “Bitbucket Pipelines”
  - Push를 하거나 Pull Request가 일어날 때 자동으로 동작
  - Bitbucket이 자신이 제공하는 클라우드에서 테스트해줌
  - “어떤 환경에서, 어떤 bash 명령어를 실행할 것인가?”
